Professional Experience

Self-Employed - *Personal coding projects*

- Self-taught frontend developer. Designed and coded various projects as seen on my portfolio.

SafeMoon - Change and Release Manager

- Successfully established a change and release system from the ground up, including creating processes such as CAB meetings and change approvals.
- Led a team of manual QA testers, overseeing their daily work and ensuring high-quality standards were met.
- Initiated the development of a testing automation department, creating the groundwork for future automation efforts.

Proofpoint - Senior QA Engineer

- Primarily led manual testing effort designed for management and governance.
- Built testing servers from the concept to production.
- Implemented agile development method for designing test models and executing the daily tests.
- Practiced SCRUM methodology for two-week sprints leading daily standups and project management.
